“Empire’s constant product innovation is the mantra for our success”

Creativity, ingenuity and perseverance have made Empire the first choice for adhesive tapes since the company's inception in 1993. People around the world have looked to Empire for products and ideas that solve problems and make an impact to their industrial applications. Our achievements are the foundation of a proud past, a bright future and for many new tape innovations to come. The company has always believed that if we give our customers the very best tapes, of the very highest quality and with the highest level of service, that would be the best advert for the company.

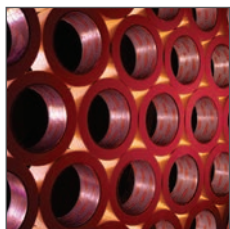

The Empire team create a climate that turns Empire into a new product powerhouse. We see ourselves as the “architects” of innovation when it comes to delivering a diverse range of specialist adhesive tapes. Sustaining innovation in a growing company is a massive challenge. Empire walks the innovation “high wire” and constantly invests in product development and converting excellence. Our people share ideas and solve customer problems across the widest range of industries. Empire’s constant product innovation is the mantra for our success. We believe that it takes flexibility, creativity and sometimes a willingness to take a risk, to ensure that we maintain our success and continue to deliver the widest range of tapes.

We have a history of investing in our people to enable them to gain the knowledge, enthusiasm and customer care that has put Empire at the very cutting edge of today’s adhesive tape market. Much of Empire’s rich culture comes from the principles first set down by the founders and owners of the business; Dean Sherriff and Mark Stanley. They believe “Create your own style, let it be unique for yourself and yet identifiable for others”.

Over the years, more than anything, they have ensured that building a happy, knowledgeable and passionate winning team gains the best results. They believe that this camaraderie, closeness and strength filters through to their clients which in turn breeds loyalty, long term friendships and sets Empire apart from its competitors. Ultimately the company has always lived by the rule “Success is not the key to happiness. Happiness is the key to success. If you love what you are doing, you will be successful”.

“Our philosophy today is the same as the day we commenced trading”

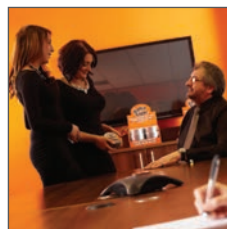

Our Production and Logistics remain the envy of our industry as we continue to invest in state of the art converting machinery and in line packaging offering the complete converting service for customers exacting requirements. We carry extensive stocks of manufactured production rolls to enable immediate availability on any roll width, branding or length our clients require. Our philosophy today is the same as the day we commenced trading, our customers demand what they want and we deliver on those demands with the flexibility and expertise our clients have come to expect.

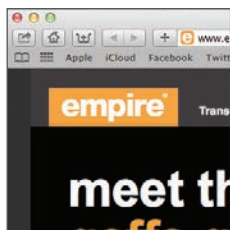

Size Matters – We can slit any bespoke width or length

empire®

In our Sales and Administration department we pride ourselves in offering the most courteous and professional customer service not only within our industry but within business in general. The Directors, Managers and Staff work in an open office environment to enable us all to focus and best serve our wide range of clients. We believe the experience and professionalism filters from the Directors all the way through our team which delivers precise, informative and expert service.

We understand that in todays modern world internet access to online information is crucial, so to coincide with this catalogue we have added the content to our online site at www.empiretapes.com. Our aim is to have an accessible, dynamic, top quality website that meets the needs of customers old and new. We aim to develop a source of accurate, up-to-date information, new product and news updates as we continue to develop our ever expanding range of adhesive tapes.

“Our goal is to provide
the highest level
of service”

Empire Tapes are the leaders and innovators in the pressure sensitive adhesive tape market and our goal is to provide the highest level of service, the broadest selection of products and the most competitive prices. We are a values-driven company and our eight core beliefs are:

1. Excellent customer service

2. Taking care of our people

3. Continual investment in the latest conversion practices

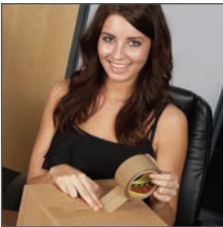

4. Understanding our clients needs and remaining flexible

5. Creating new and innovative tapes to meet specific applications

6. Respect for all people

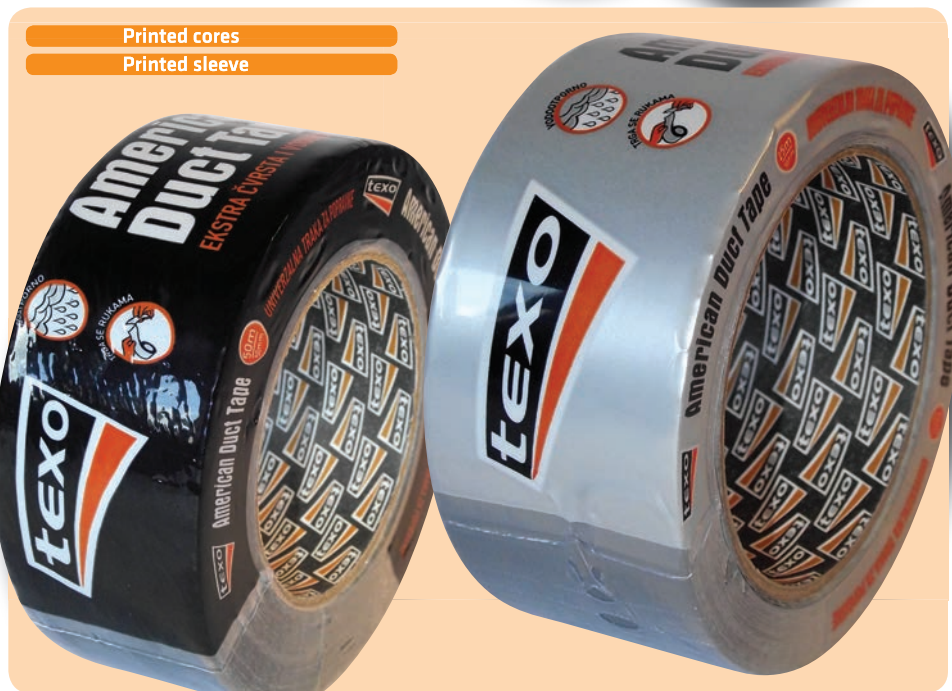

7. Entrepreneurial spirit

8. Building strong customer and supplier relationships

SP240160

We recognise clients today demand different styles of packaging when they showcase their tape. Below we have a variation of packaging styles we produce in-house but we have the flexibility to produce any bespoke packaging you require.

Size Matters – We can slit any bespoke width or length

“The science behind our tapes”

At Empire our tape experts are always here at the end of the phone to help you to select the right tape for the job. To help you understand the science behind how we choose the right tape for you we have put together a quick reference guide so you can understand the Empire tape range and understand the reasons why we suggest certain tapes for different applications. To help us make sure we find the optimum tape for your particular application, we need to consider several factors:

- **Empire Backing**
- **Empire Adhesive Type**
- **Application Time and Temperature**
- **Surface Characteristics (roughness, surface energy, contours, etc.)**
- **End-use Conditions (temperature, UV-exposure, abrasion, etc.)**

The information on these pages integrates those factors to help you narrow your selection to fewer products for a more in-depth evaluation.

Empire Tapes Backing Materials

In many applications, Empire backings add a second surface that affects how the underlying surface relates to the environment. To optimize that relationship, Empire backings offer a wide choice of performance and handling characteristics.

BACKINGS	CHARACTERISTICS
Paper	
Crepe	Conformable, easy tear
Flatback	Strong, smooth, good for straight line masking
Kraft	Strong, some versions are repulpable
Tissue	Thin, porous to allow adhesive penetration of sheet
Plastic	
Polyester	Strong even when thin, chemical resistant, high temperature resistance
Polypropylene	Resistant to most solvents, conformable, tear resistant
Polyethylene	Conformable, easy to stretch, chemical/acid/moisture resistant, economical
Polyethylene / Polypropylene Co-polymer	Conformable, chemical/acid/moisture resistant
UHMW - Polyethylene	High abrasion resistance, low coefficient of friction, anti-stick surface easy to clean
Polyvinyl Chloride (Vinyl)	Conformable, abrasion resistant, resistant to most chemicals
Polyimide	High temperature resistance, excellent dimensional stability, good insulation properties
Polyamide (Nylon)	High temperature resistance, high strength and toughness, good chemical resistance but can absorb moisture
Polytetrafluorethylene (PTFE)	Low coefficient of friction, excellent high temperature and chemical resistance, anti-stick/release properties
Polyvinyl Alcohol (PVA)	Water-soluble, organic solvent resistant, high temperature resistance
Polyurethane	Abrasion/scratch resistant, impact/puncture resistant, UV and corrosion resistant
Polyvinyl Fluoride	Excellent weather resistance, excellent long-term UV resistance, thin yet stiff feel
Cloth	
Cotton	Strong, easy tear by hand, soft and drapable
Glass Cloth	Strong, high temperature resistance, flame-resistant
Polyethylene Coated	Strong yet hand-tearable, abrasion resistant, water-resistant, conformable
Non-Woven	
Fibre	Air permeable, strong enough to hold expanding foams
Metals	
Aluminum	Heat and light reflective, moisture and chemical resistant, flame-resistant, outdoor weather resistant, conformable.
Lead	Electrically conductive, acid resistant, high conformability, x-ray opacity
Rubber	
Neoprene	Abrasion resistant, die-cuttable
Combination (Laminates)	
Paper / Polyethylene	Weather and chemical resistant, hand tearable, stretch resistant
Metalised / Polyester	Reflective, decorative
Glass Cloth / PTFE	High temperature resistance, high strength
Glass Cloth / Aluminum	Very high temperature resistance, high strength
Non-Woven / Aluminum	High heat and cold resistance

Adhesive Types - Empire Pressure Sensitive Adhesives

Our industrial tape products feature Empire pressure sensitive adhesives that bond the backing material to another surface on contact. Each adhesive has different characteristics that affect production and end-use performance.

Rubber	Pure Acrylic	Modified Acrylic	Silicone
High initial bond	Moderate initial bond	Bonds to wider variety than standard acrylic	Fair initial bond
Softer	Firmer	Softer	Very firm
Widest variety of surfaces	High surface energy	Many surfaces	Fewer surfaces
Up to 90°C	Up to 200°C	Up to 150°C	Up to 350°C
Fair chemical resistance	Excellent chemical resistance	Good chemical resistance	Excellent chemical resistance
Fair UV resistance	Excellent UV resistance	Moderate UV resistance	Excellent UV resistance
Poor aging	Excellent aging	Durable	Excellent aging
Removable	Permanent	various	Removable
Good solvent resistance	Excellent solvent resistance	Good solvent resistance	Excellent solvent resistance

Application Time and Temperature

Applying firm pressure to the bond increases adhesive flow and contact for more secure bonding. Time and temperature will typically further increase contact and adhesion values.

Adhesive Surface Contact

Surface energy ranges from high to low. To illustrate the concept of surface energy, think of water on the unwaxed hood of a car. The unwaxed hood has high surface energy, and water on the hood flows into puddles. In comparison, a waxed hood has low surface energy, and the water beads up rather than flows out. Similar to water, adhesive on a high-surface-energy (HSE) surface flows and “wets out” the surface; this “wetting out” is required to form a strong bond.

As a rule of thumb, the higher the surface energy, the greater the strength of adhesion. Specially formulated adhesives are available for low-surface-energy (LSE) surfaces. Regardless of surface energy, the substrate must be unified, dry, and clean to maximise adhesive contact.

Size Matters – We can slit any bespoke width or length

24mm X 66mtr	72
48mm X 66mtr	36
48mm X 132mtr	36
48mm X 990mtr	6
75mm X 66mtr	24
75mm X 990mtr	4

Low Noise Polypropylene Tape

Low noise acrylic Polypropylene Tape with a superior high coat weight of adhesive, providing excellent performance with low noise unwind. As with the 1130 it must be stored between 12-17°c to get optimum performance and this is also surface printable.
Colour: Buff, Clear
Adhesive: Acrylic

Product Code 1231

Standard Size	Box Quantity
48mm X 66mtr	36

Hot Melt Polypropylene Tape

Hot melt PolypropyleneTape is best suited for all recycle cartons as the adhesive properties give instant grab to even the worst recycle cartons. Can be printed top surface for small runs & under surface for larger print runs. Hot melt offers good all round performance when conditions are less than perfect.
Colour: Buff, Clear, White, Red, Blue, Green, Yellow
Adhesive: Rubber

Product Code 1135

Standard Size	Box Quantity
48mm X 66mtr	36
48mm X 990mtr	6
75mm X 990mtr	4

Solvent Polypropylene Tape

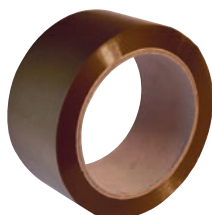

Solvent Polypropylene Tape is best suited when the packaging environment is dusty, damp and temperatures are below ambient room temperature. High tack solvent adhesive provides an instant seal, superior strength & is recommended when parcel weights exceed 20kg.
Colour: Buff, Clear
Adhesive: Rubber

Product Code 1138

Standard Size	Box Quantity
48mm X 66mtr	36

PVC (Vinyl) Tape

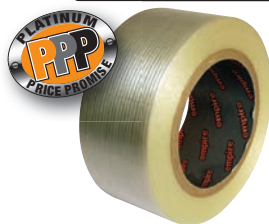

Vinyl Packaging Tape offers superior performance and is tearable by hand. Suitable for any packing conditions, can be used for something as small as bag neck sealing, up to tri wall cartons over 25kg. Vinyl is recognised as the best performance based Packaging Tape & we're able to print up to 3 colours in a variety of widths.
Colour: Buff, Clear, White, Red, Blue, Green, Yellow
Adhesive: Rubber

Product Code 1140

Standard Size	Box Quantity
12mm X 66mtr	144
25mm X 66mtr	72
48mm X 66mtr	36

Reinforced Monoweave Filament Tape

This Filament Tape has an aggressive adhesive and is ideal for light to medium bundling and palletising applications where a cost effective tape is required. The mono directional strength makes this the ideal tape for non critical applications.
